

# NEAAR/TransPAC Update

**Andrew Lee**  
**GLIF Americas meeting**  
**Sept 19, 2018**  
**Helsingør, DK**

# The NEAAR Collaboration

- Funding from US National Science Foundation
  - \$3.25M over 4 years
- Partners:
  - Indiana University
  - GEANT
  - UbuntuNet Alliance
  - WACREN
  - ASREN
  - SANREN/TENET

## Collaboration with ESnet & NEAAR

**NORDUnet**  
North's Gateway for Research & Education

**INTERNET<sup>2</sup>**

**ESnet**  
ENERGY SCIENCES NETWORK

**Ψ**

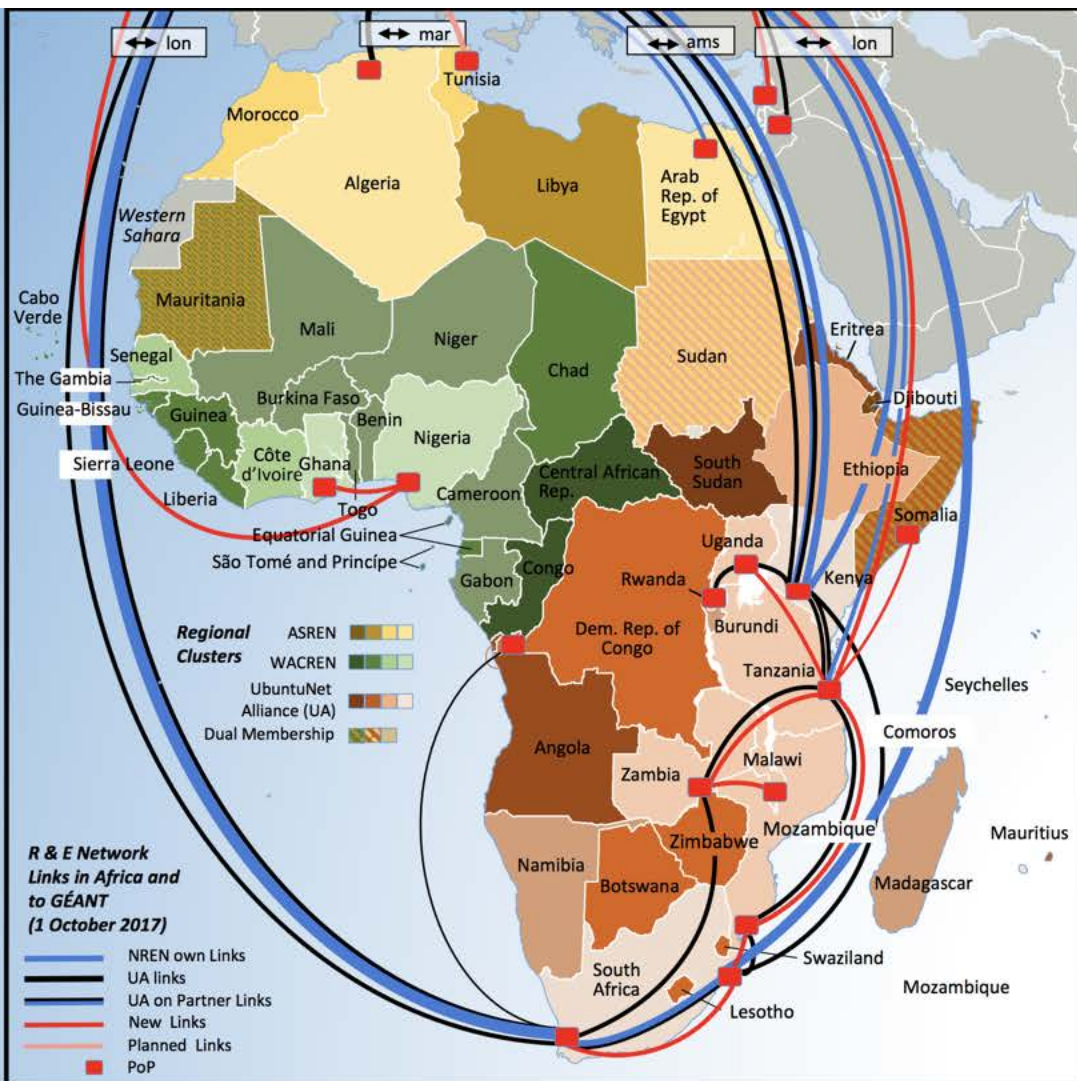

**canarie**

**GÉANT**

**SURF NET**

Oct.  
2017

# TransPAC

AMERICA CONNECTS TO ASIA

- **TransPAC project was started in 1998**
- **Provide connectivity between the US and the Asia Pacific region for educational and scientific research usage**
- **Cooperative partnership among Indiana University, APAN, TEIN/Asi@Connect, JGN/NICT-Japan, NII-Japan, CERNET, and others**

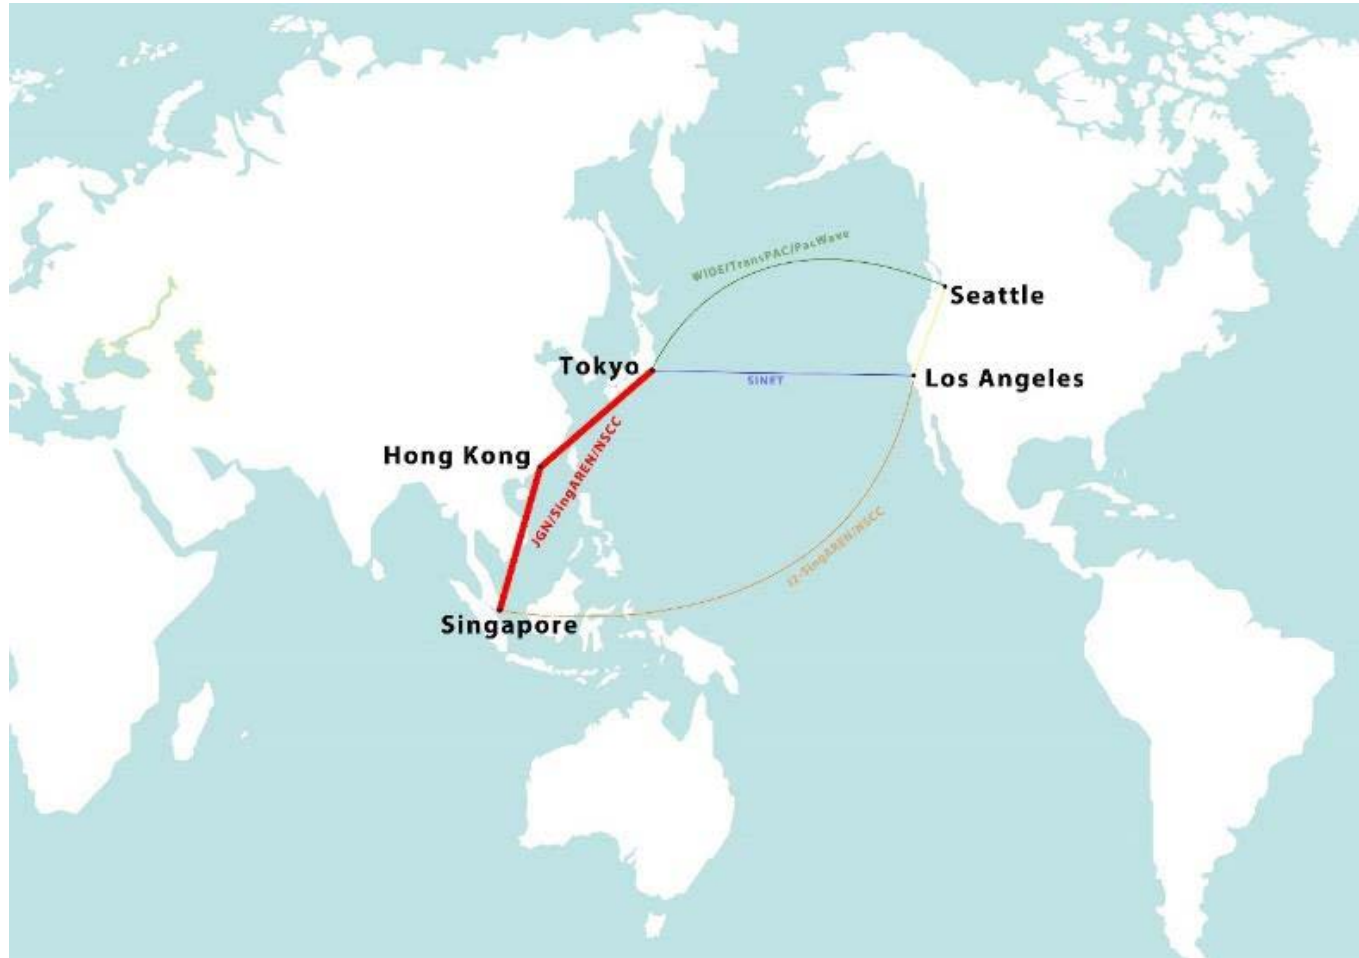

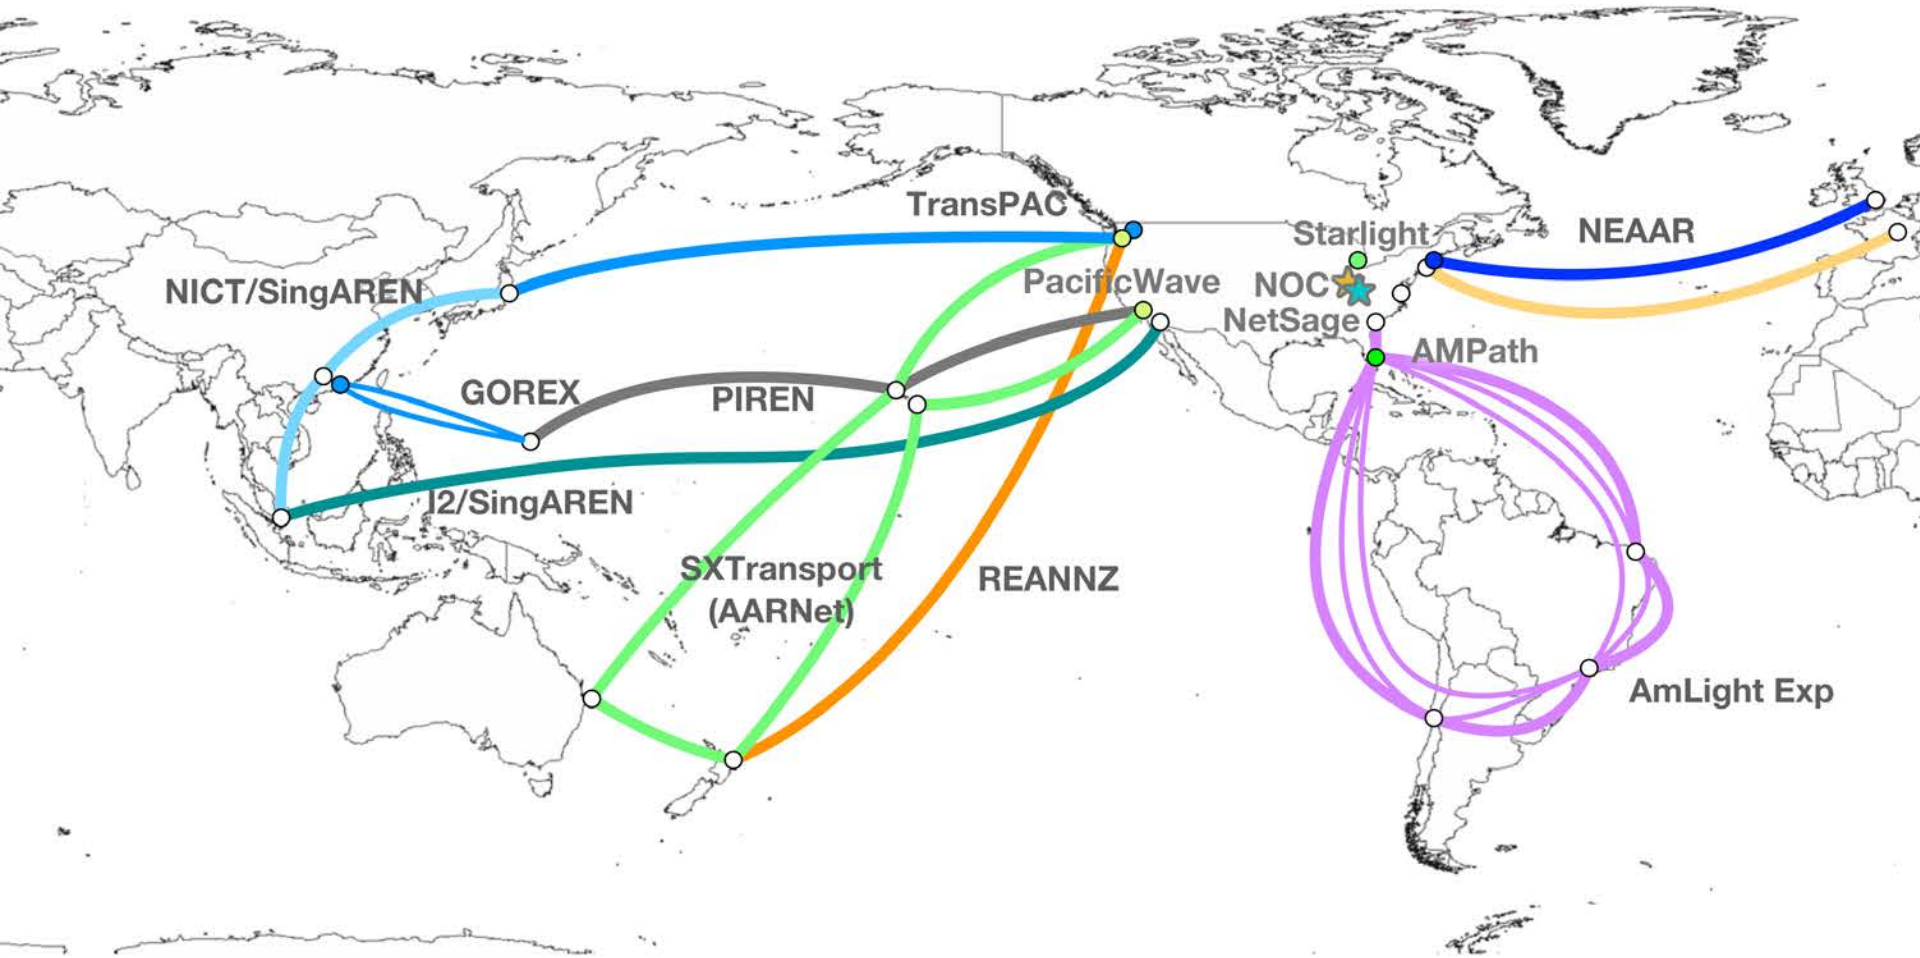

INDIANA UNIVERSITY

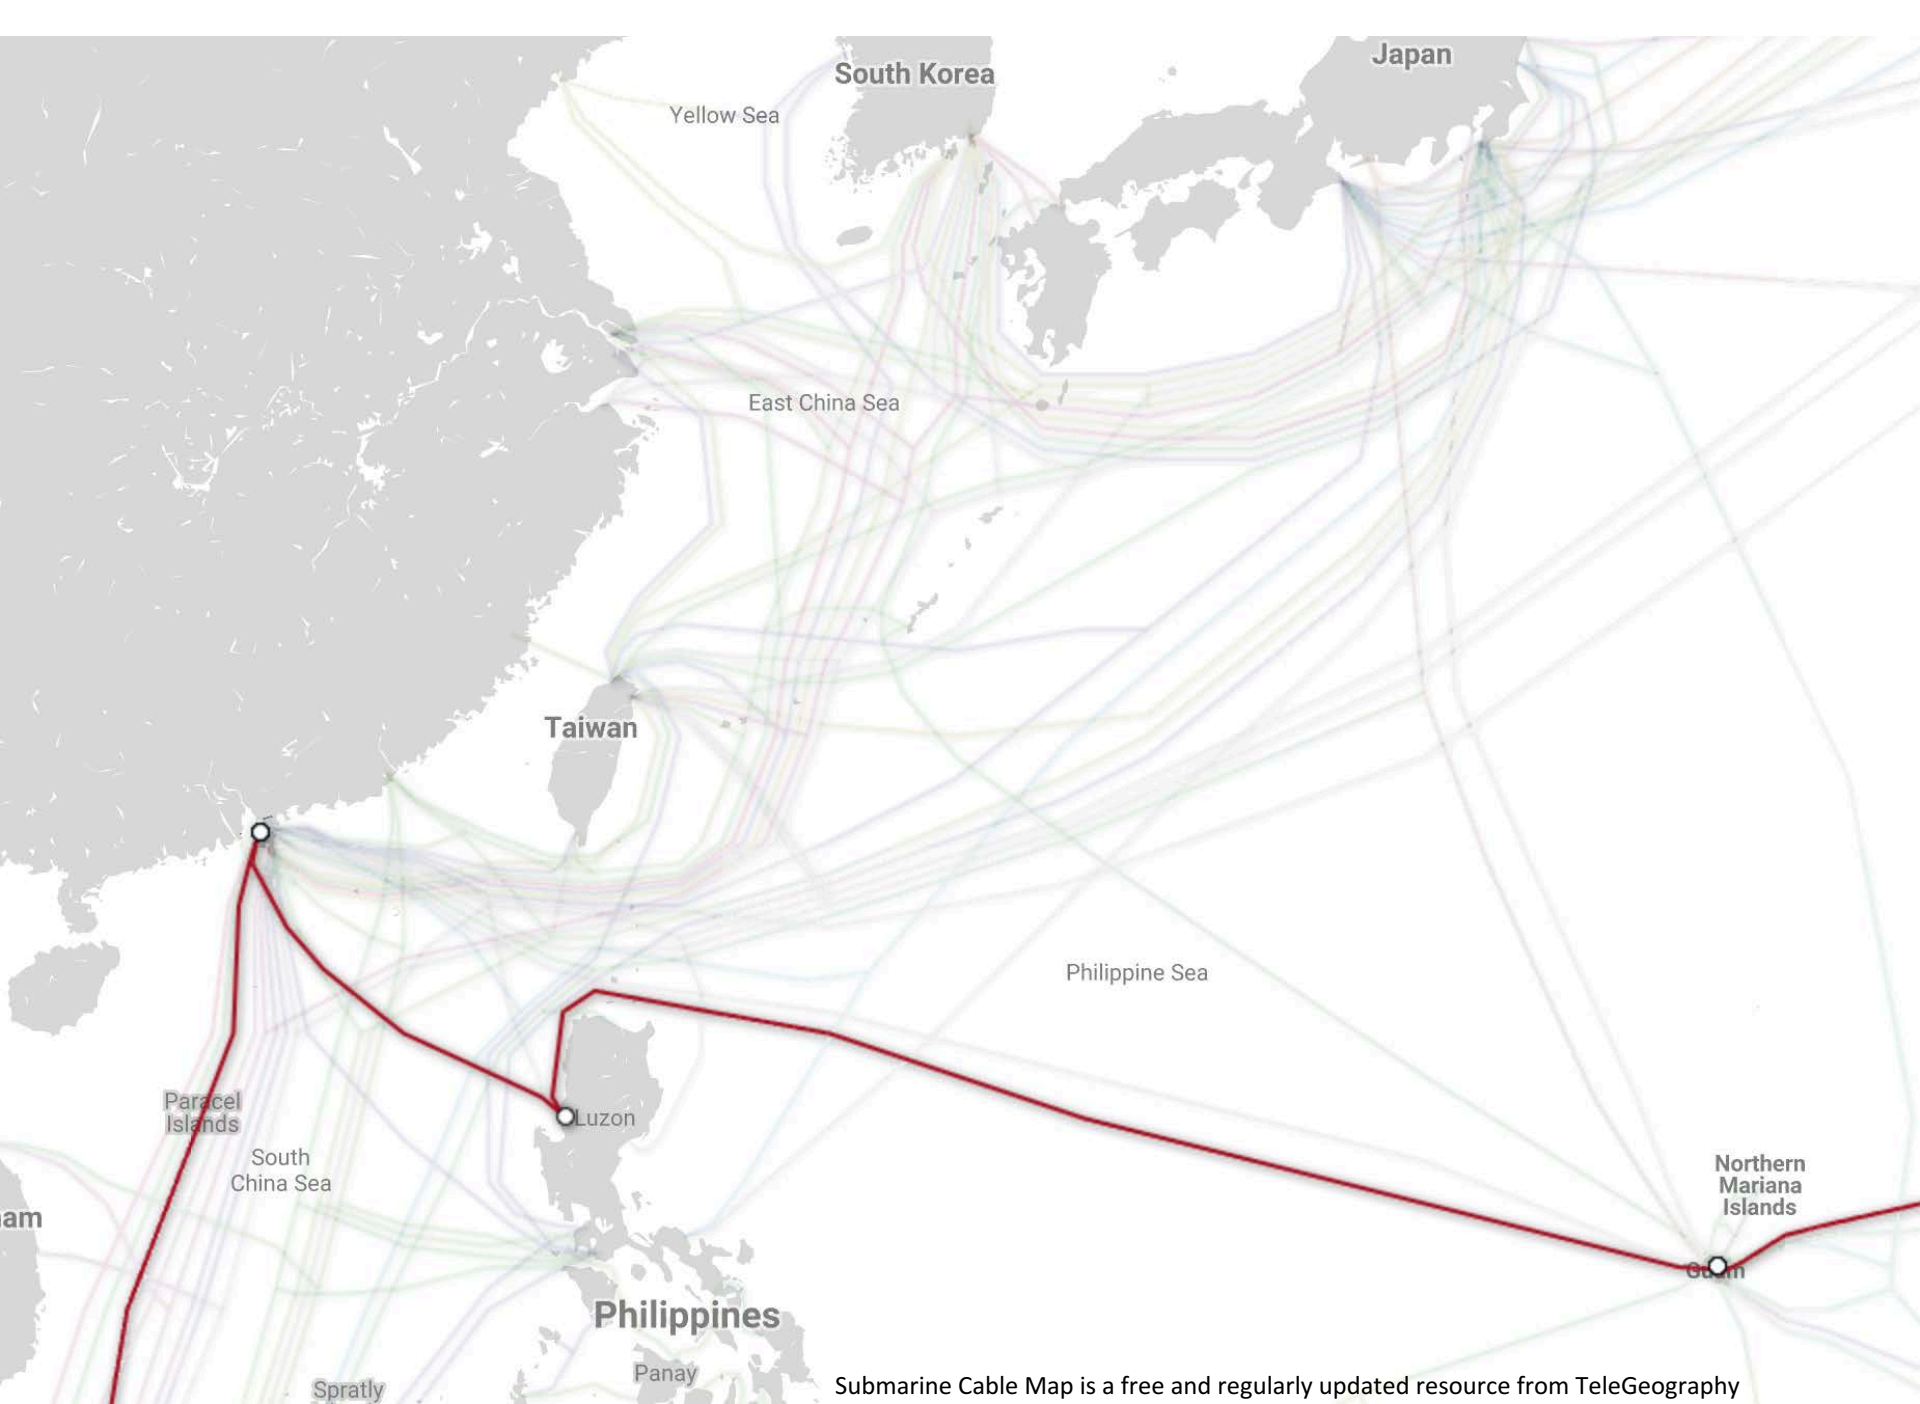

INTERNATIONAL  
NETWORKS  
At Indiana University

# Asia Pacific Ring (APR)

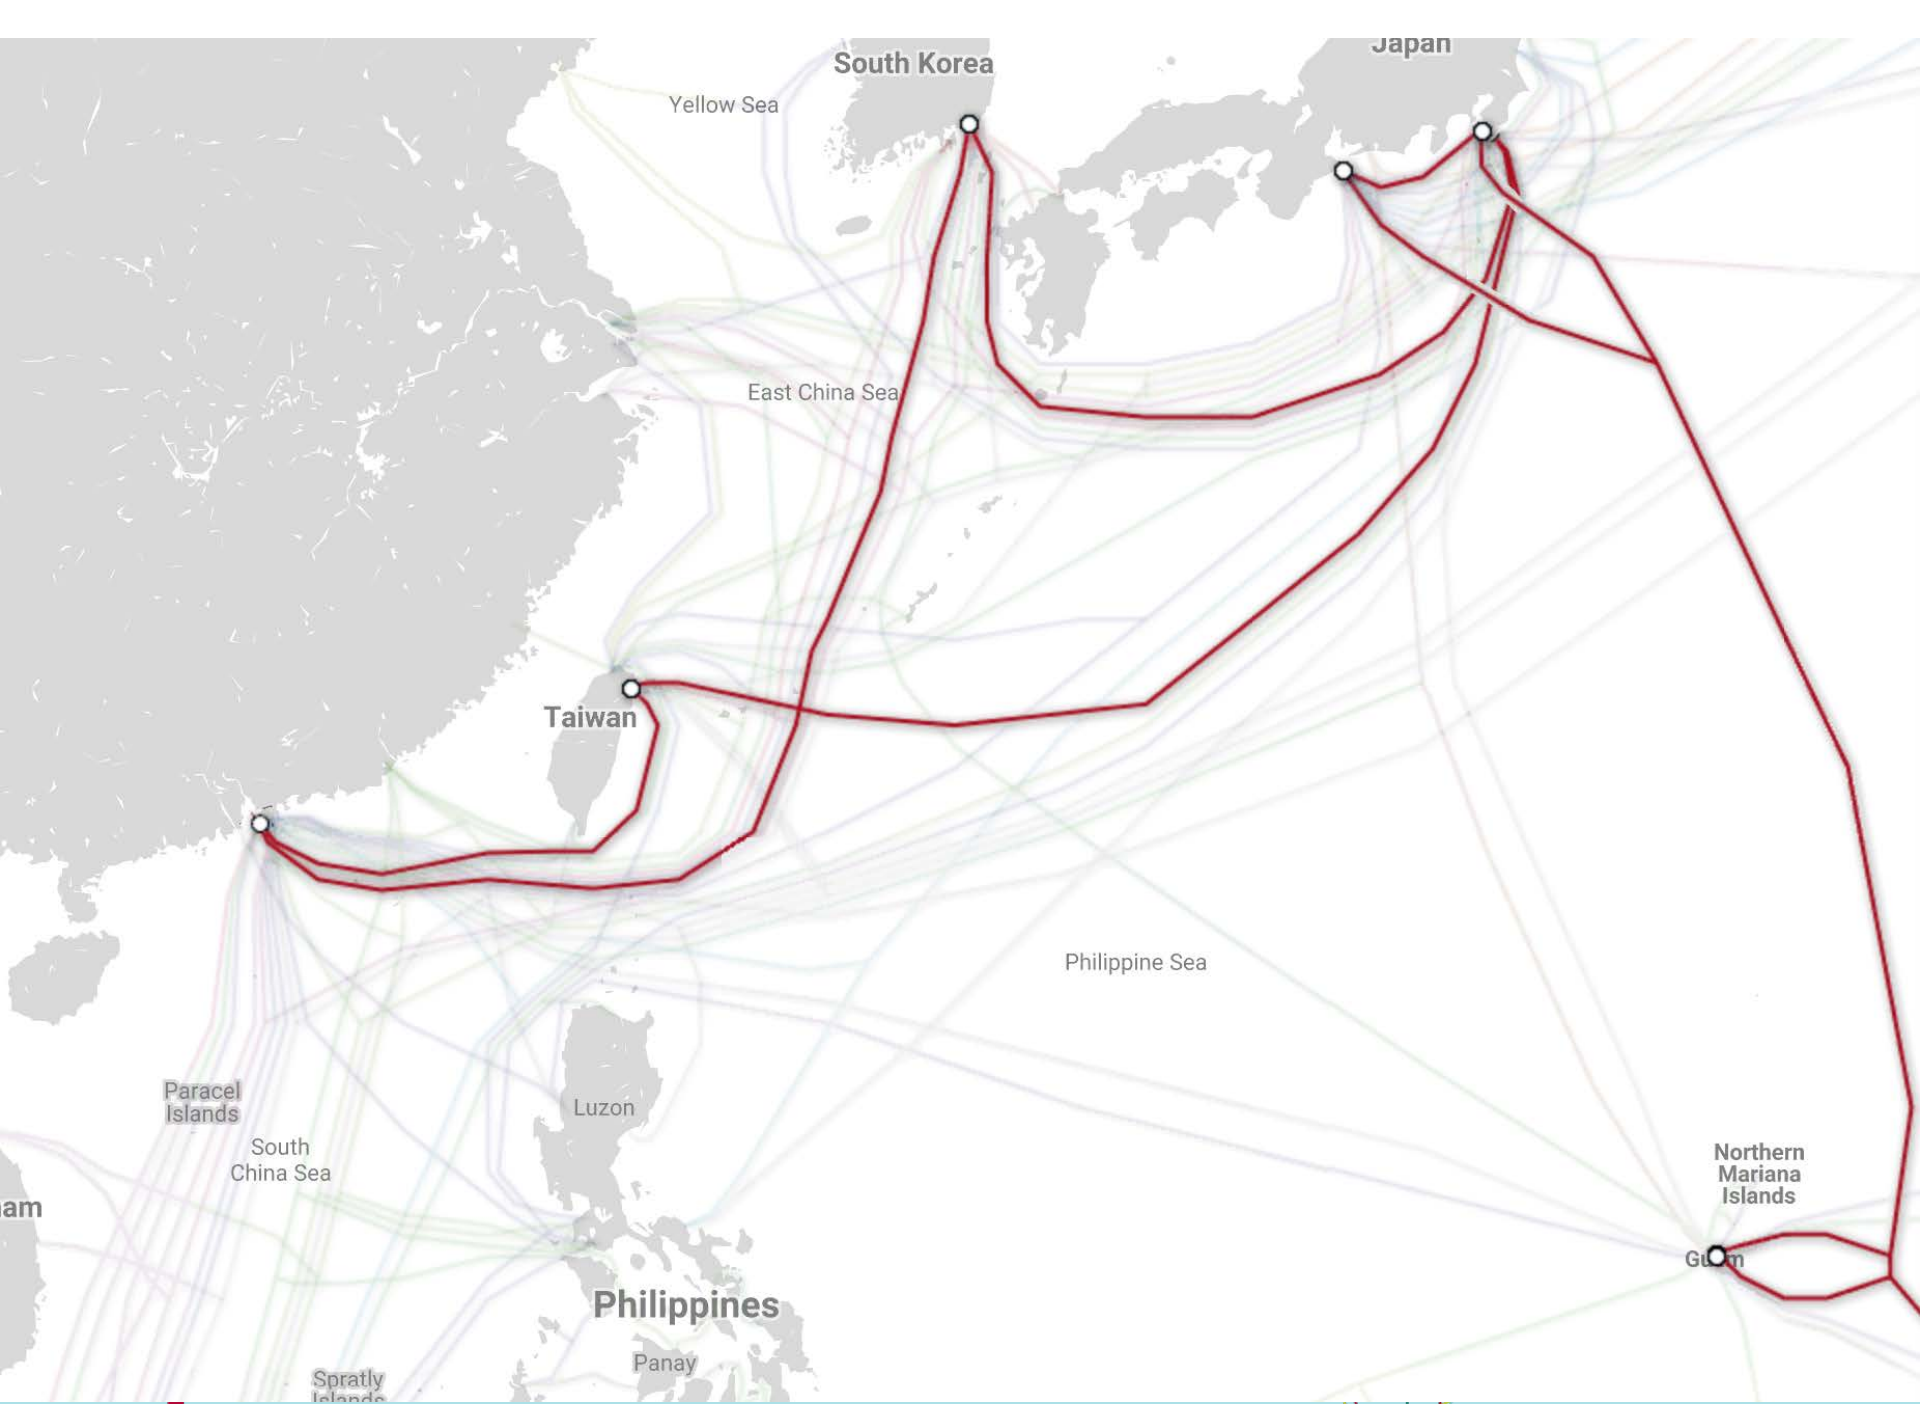

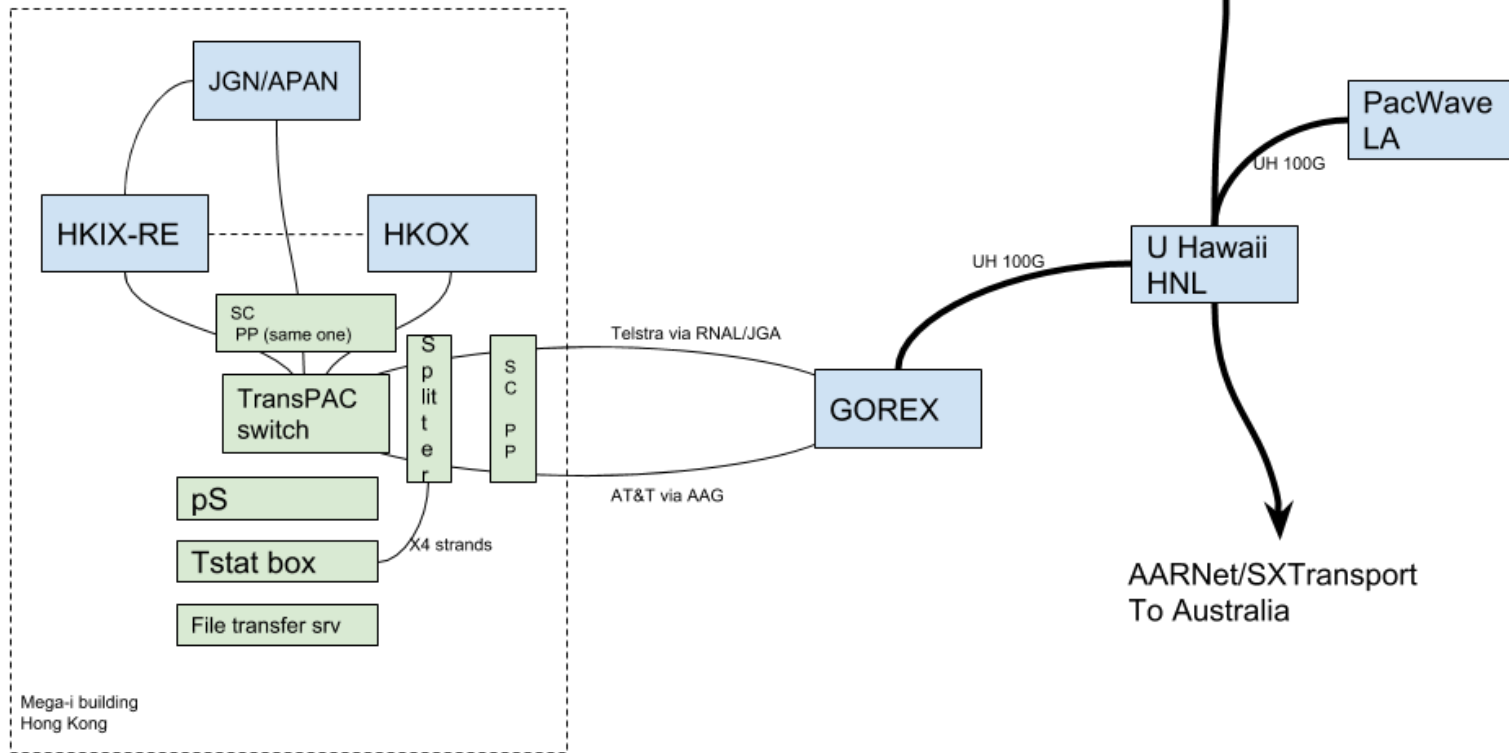

Submarine Cable Map is a free and regularly updated resource from TeleGeography

**At Indiana University**

# Research & Engagement

- **Research work on DDOS detection/mitigation**
- **Policy work to examine routing behavior across the networks**
- **Role of file transfer infrastructure on the international backbone**
- **Reach out to users/researchers/communities that are using or wanting to use the network**
- **Automated network configuration and user self service**
- **Training**

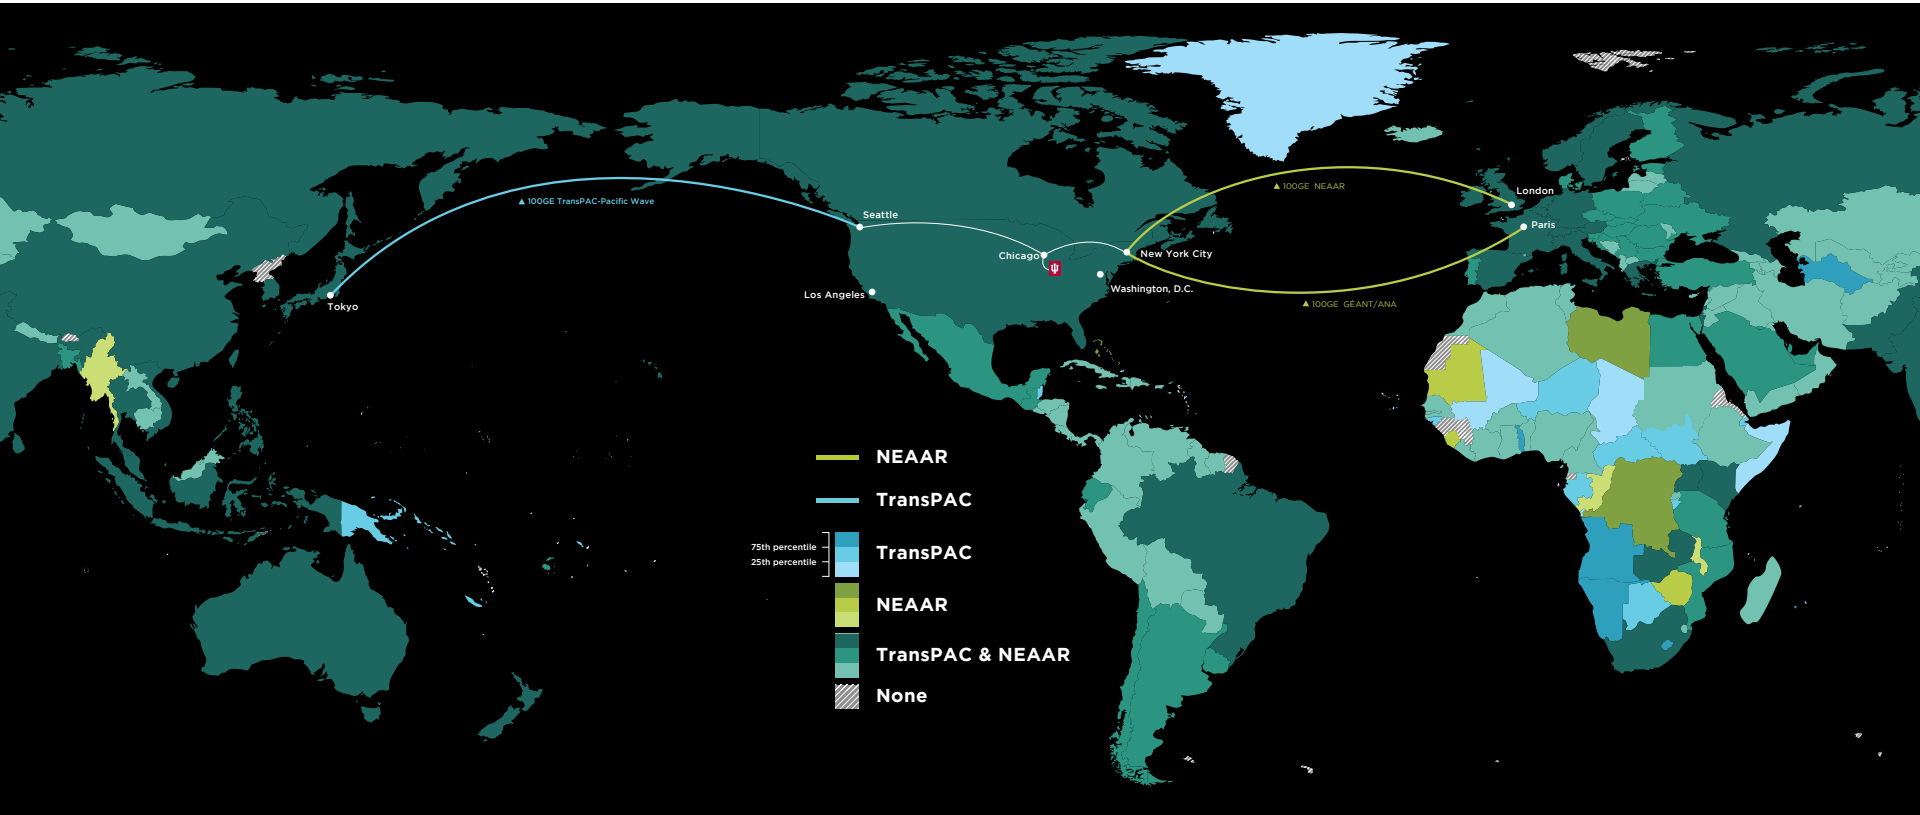

# Training

- **Domestic Workshops utilizing IN@IU-funded equipment and/or personnel**
- ***In Planning*** - [SoX FIONA and perfSONAR Workshop - Sep. 2018](#) (1-day pS) - Atlanta, GA
- [OIN sponsored by LSU and LONI - Dec. 2017](#) (2-day) - New Orleans, LA
- [OIN sponsored by NYSERNet - Sep. 2017](#) (2-day) - New York, NY
- [OIN sponsored by University of Hawaii - Aug. 2017](#) (2-day) - Honolulu, HI
- [Virtual OIN - Jun. 2017](#) (2-day) - Online
- [OIN sponsored by University of Utah - Jun. 2017](#) (2-day) - Salt Lake City, UT
- [OIN sponsored by NYSERNet - Mar. 2017](#) (2-day) - Syracuse, NY
- [OIN sponsored by University of Miami - Jan. 2017](#) - Miami, FL
- [OIN sponsored by Vanderbilt University and SOX - Dec. 2016](#) (2-day) - Nashville, TN
- [OIN sponsored by iLight - Jul. 2016](#) (2-day) - Bloomington, IN
- [OIN sponsored by Washington University - Oct. 2015](#) - St. Louis, MO
- [UCSC perfSONAR Deep Dive - Jun. 2015](#) (3-day) - Santa Cruz, CA
- **NEAAR Workshops utilizing IN@IU-funded equipment and/or personnel**
- ZAMREN perfSONAR Workshop - Sep. 2018 (4-day) - Lusaka, Zambia
- [AfriNIC / AIS 18 Conference - Internet Measurements and Research in Africa Workshop - May 2018 \(1-day\)](#) - Dakar, Senegal
- [WACREN Conference - Oct. 2017](#) (4-day) - Accra, Ghana
- [SANREN OIN Workshop - May 2017](#) (two 1-day) - Cape Town / Pretoria, South Africa
- [KENET Training with NSRC - Sep. 2015](#) (4-day) - Nairobi, Kenya
- **TransPAC Workshops utilizing IN@IU-funded equipment and/or personnel**
- ***In Planning*** - Asi@Connect Workshop - July 2019 (2-day) - New Dehli, India
- ***In Planning*** - Asi@Connect Workshop - Mar. 2019 (2-day) - Loas
- [APAN 46 perfSONAR Workshop - Aug. 2018](#) (1 day) - Auckland, New Zealand
- [APAN 44 perfSONAR Workshop - Aug. 2017](#) (1 day) - Dalian, China
- [International OIN sponsored by PREGINET - Mar. 2017](#) (2-day) - Manilla, Philippines
- [APAN 43 perfSONAR Workshop - Feb. 2017](#) (1 day) - New Dehli, India
- [APAN 42 OIN Workshop - Aug. 2016](#) (2-day) - Hong Kong
- [APAN 41 perfSONAR Workshop - Jan. 2016](#) (half-day) - Manilla, Philippines
- [APAN 40 perfSONAR Workshop - Jan. 2015](#) (1-day) - Kuala Lumpur, Malaysia
- 

# Training

# Detecting and dealing with Routing Anomalies

- **Proper analysis of flow and tstat data allows us to mine for conditions that might not be obvious**
- **Even cursory examinations of the data allow us to find odd conditions**
- **In NEAAR Y3Q1 sFlow data, I can see there was:**
  - **1.2TB of data transmitted towards Europe with a IP source in Africa**
  - **15TB of data incoming into the US has an IPdestination in Europe**

# Why?

- **Flaw in the analysis**
  - Error in data collection
  - Error in correlation of flow -> AS/Country
- **Transient routing issue**
  - Link goes down to force traffic on to a (by definition) suboptimal path
- **Sometimes what appears to be suboptimal is intended**
- **Routing policy issue**
- **Perhaps something else I haven't thought of**

# So?

- **As we build out and more greatly interconnect these networks we need to pay more attention to routing issues**
- **Backup agreements**
- **Historical routing policies that no longer make sense**
- **Find opportunities (often times without costs) to improve routing fabric by peering**
- **Be cognizant of unintended consequences when setting up intercontinental peerings**

## Some more data and examples

- Of 249 Countries (ISO 3166-1)
  - NEAAR: 166 (17)
  - TransPAC: 181 (32)
  - Both: 198
- Just looking at the map, some things seemed odd
  - African and European countries showing up on the TransPAC circuit
  - Traffic for countries that don't have an established NREN

# DNS Strangeness

- DNS Traffic between South Africa and WIDE-Japan M-Root Servers?
  - DNS misconfiguration? There are closer servers.
  - Purposefully done?
  - Anycast issue?
    - Routing misconfiguration?
    - Global best practices may be needed to keep Anycast in Region
- Africa-GEANT-ANA/NEAAR-Internet2-TransPAC-Japan?
  - Why not over the TEIN or other links between EU and Asia.

# Routing thru US for traffic destined to Asia?

- European hosts consistently show up in Top 10 reports.
  - Are there possible routing changes that could be employed? 15 vs 25 or more hops in some instances.
  - Steer traffic to TEIN?
  - Political / Financial choice?
- Some Asian NRENs specifically AS pad their announcements to European NRENs to steer traffic to US.

TransPAC Year 4 Quarter 1  
Top 10 ASN destinations inbound into the US
